

Cixi AnXon Electronic Co., Ltd is a private joint venture which dedicated to offer high reliability electronic components for customers all over the world with the brand of AnXon, AXC, RF PARTS & AOGE.

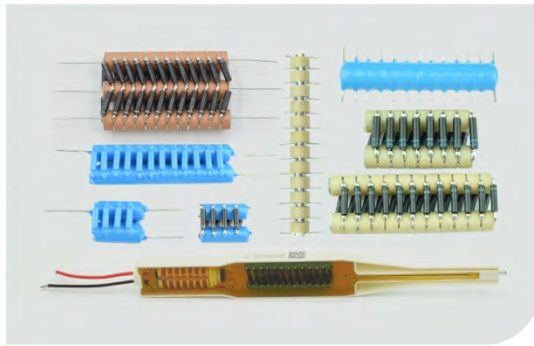

Through years efforts, AnXon now is the well known supplier of Capacitors, Diodes, Power tubes, Resistors and other components. Each product we offered are manufacturer by state-class factories, we know successful customers are what ensure our own success.

High Voltage Ceramic Capacitors

Cixi AnXon Electronic Co., Ltd is a leader in the design and manufacture of complex electronic ceramic components and assemblies used in a wide range of applications . Main products are HV radial lead disc capacitors, ultra HV screw doorknob capacitors, AC live line capacitors, Voltage Multiplier Assembly, Ceramic capacitor stacks.

RF Power Ceramic Capacitors

Our high-power RF ceramic capacitors are mainly used in high-frequency welded pipes, high-frequency hardening, high-frequency electric furnaces, high-frequency drying, plastic heat sealing machines and radio communication equipments.

AnXon high-power RF ceramic capacitors has a history of more than 30 years. The products have won a great reputation in domestic and abroad, and the market share has ranked first in domestic for many years.

Power Electronics Film Capacitors

AnXon offers highest quality and reliability power electronics film capacitors manufactured by our factory which certified by ISO9001, ISO14001, IATF16949.

Products are widely used for Motor drives, Wind & Solar energy, Car charger stations, Energy storage, Power transmission stations, Urban transport equipment etc..

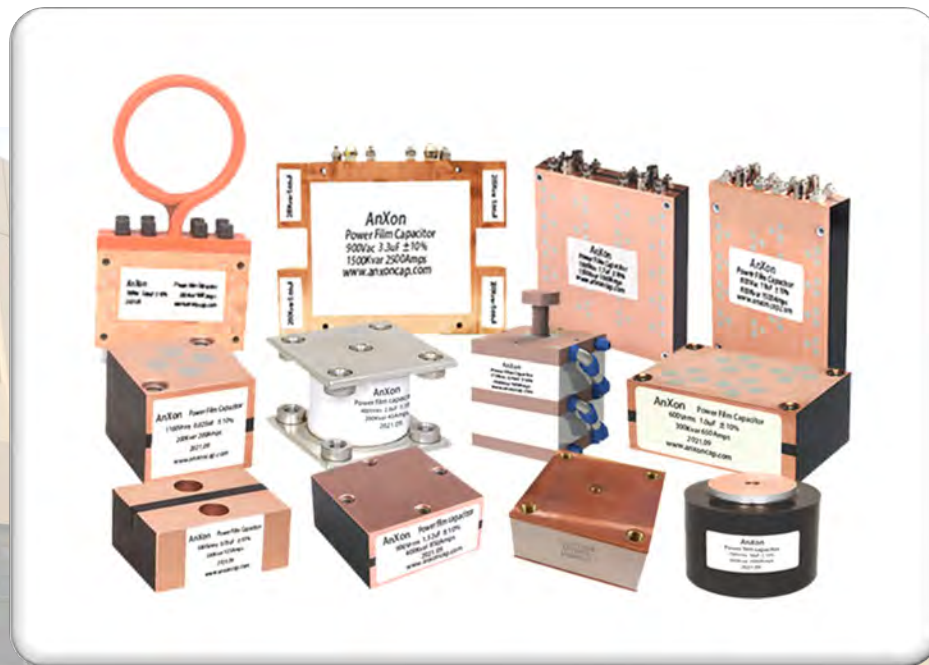

Conduction Cooled Capacitors

AnXon provide conduction cooled capacitors.

Products are widely used for Induction heating, Plasma generators/Plasma applications, Medical equipment/Medical imaging, Magnetizers, Electric vehicle chargers, Auxiliary power supplies, Resonant circuits, Heat Treatment, Wireless Power Transfer, Ipt, High Frequency Inverters.

Aluminum Electrolytic Capacitors

AnXon aluminum electrolytic capacitor factory starts from 1987, over 30 years dedicated to large electrolytic cap only, advanced equipment, patent technology, rich production experience and quality controls make the products have won a great reputation in domestic and abroad .

High Voltage / High Temperature Mica Capacitors

AnXon has been your premier source for high-voltage mica capacitors and integrated electronic sub-assemblies. Serving the military, industrial and commercial markets since its inception.

AnXon's track record of outstanding workmanship and quality has made their name synonymous with the terms dependability, reliability and high-performance.

Super Capacitors

AnXon Super Capacitors (SC) can be widely used in smart three-meters, toys, transportation, medical treatment, communications, railways, heavy industrial equipment, UPS systems and other industries.

Tantalum Electrolytic Capacitors

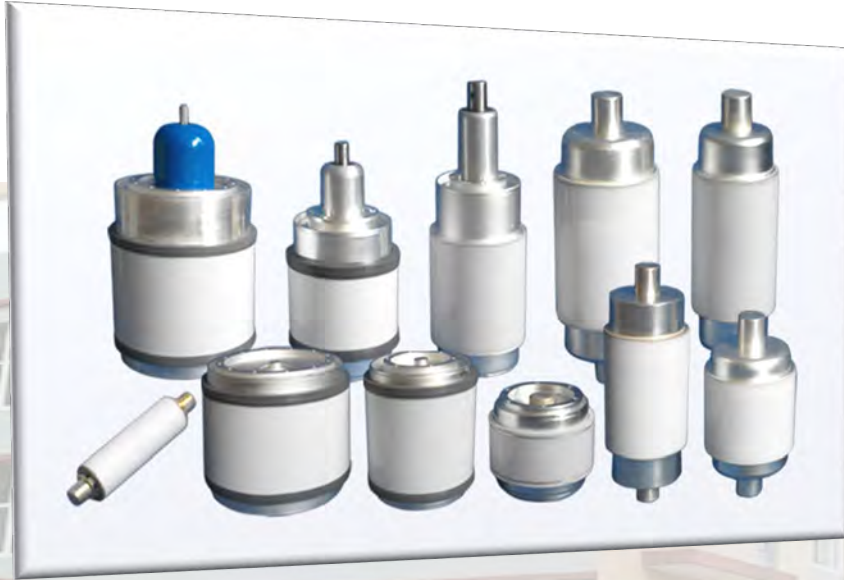

AnXon offers highest quality and reliability tantalum electrolytic capacitors made by China military factories.

The factory has more than 20 years of experience in R&D, production and complete R&D, manufacturing, quality management and testing process which passed ISO9001, AS9100C, IATF16949 and other quality management system certifications and CNAS laboratory capacity accreditation.

The products are widely used in aircraft, vehicles, ships, radars, electronics and other fields, as well as smart phones, industrial control equipment, medical equipment, charging piles, notebook computers, instrumentation, automotive electronics and other fields.

Vacuum Capacitors

AnXon offers you the benefit of more than 50 years of expertise in vacuum technology, producing the world's finest non-thermionic vacuum components for high voltage and high frequency applications.

Vacuum Relay

AnXon offers you the benefit of more than 50 years of expertise in vacuum technology,

producing the world's finest non-thermionic vacuum components for high voltage and high frequency applications.

High Voltage Rectifier Diodes

AnXon's high voltage diode factory is established in 1989 as a state-owned enterprise, after the transformation, it is a joint venture with American company.

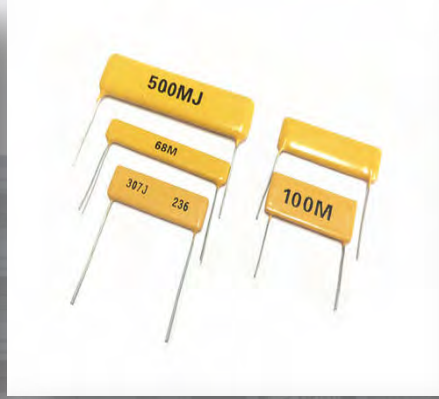

Our main technology and equipments of production were introduced from USA. With more than 30 years experience, now we can afford the request from our customers all of the world and can reach zero complaint rate.

Electron Power Tubes

AnXon Electron tubes are widely used for broadcast, communications, radar, industrial heating, semiconductor processing, science and medical applications. Our factories has more than 50 years experience in the design, development and production of electronic tubes. The products has exported since 1980s and have went over tens countries with good reputation.

Resistors

Thank you

Cixi AnXon Electronic Co., Ltd
